- Repair Service WorkShop Manual: 124-Pages 20- Sections

For do it yourself servicing, teardowns, repairs, adjustments, and complete specifications. The pages are very clear and clean, pictures are great with detail, alot of detailed repair information in a very technical manual.

Easy to read exploded views to make easy identification, careful disassembly, accurate adjustment, and correct repairs. All sections are neatly organized in Adobe Acrobat,the entire document is scalable to several times normal size. Tons of illustrations, specifications, lots of pictures, some color diagrams and close-ups, lots of step-by-step instructions, special tool info etc.

This is exactly like the original manual made for these D905 D1005 D1105 V1205 V1305 V1505 Kubota Diesel Engines; the only difference is this one is not paper, and doesn't need to be shipped. You get it right away!

Zoom it, print it, save it, close it. Print a few pages at a time, as you need; no need to lug that bulky binder around anymore; no need to worry about stained, torn, or missing pages. Once you buy the manual, you will immediately get a link in your email, then just go view it, print it, and save it to your computer for many more uses later on. Viewed in the most popular Adobe Acrobat viewer which most computers have already; to download the free viewer, go to www.adobe.com

About Kubota Engines

===

The company was established in 1890 as a manufacturer of cast iron water supply pipelines and ever since, Kubota has continuously contributed to the progress of society through its manufacturing activities and technological developments. In the 1920's, Kubota developed and produced the company's first

compact kerosene engines primarily for agricultural use. In the 1930's, Kubota started producing their first diesel engines to meet the needs of people who demanded more powerful engines. Throughout the years, Kubota has always produced the most technologically advanced engines possible.

In 1937 Kubota established their Sakai Japan Plant for the exclusive production of engines in Japan. In 1958 production of their horizontal type diesel engine with a radiator started. Their success in the engine arena led to the establishment of Kubota Engine Division in 1981. Kubota celebrated their 10-millionth engine produced in 1987, and just 5 years later celebrated the overall production of 20-million engines!

Today, society is becoming more concerned with energy and environment preservation. This should lead to greater demands for even higher quality, more fuel efficient and much more versatile engines. Anticipating such needs, the Kubota Engine Division continues is researching and developing ways to produce the best engine possible. Their mission for compact diesel engines, is to strive for and attain the ultimate engine manufacturing technology.
