### About Kubota Tractors

The company was established in 1890; the Kubota Corporation has a long history of manufacturing agricultural machinery in Japan. With an excellent line of compact tractors, necessary on smaller Japanese farms. and in 1969 Kubota entered the North American market by exporting its 21 horsepower L200 compact tractors to the United States. Because of the initial success in the American marketplace, the Kubota Tractor Corporation was formed in Torrance, California in 1972. Kubota also owns other similar tractor companies in many countries worldwide. In 1974 Kubota introduced a 12 HP four wheel drive tractor in the US. Prior to 1974 USA manufacturers did not use true four wheel drive except in larger horse power models.

In 1988, Kubota opened its first American manufacturing facility, Kubota Manufacturing of America in Gainesville, GA (USA) specifically for the production of front end loader and backhoe implements for Kubota tractors. Later, other products were added including a variety of lawn and garden tractors and utility vehicles.

In 2006, the Gainesville front end loader and backhoe production facility was transferred from Kubota Manufacturing of America to a newer manufacturing facility, Kubota Industrial Equipment, near Jefferson, GA (USA). This facility currently prepares and configures the larger B, L and M series tractors from Japan for delivery to Kubota Tractor Corporation & over 1,000 dealers across the United States of America.

The popularity and low price of Kubota tractors led to a number of grey market imports of Japanese models into North America. These models lack safety equipment required in the US such as PTO shields and seatbelts. Kubota won a lawsuit in 1997 to make it illegal to distribute these tractors in the USA.

This is parts manual number: 100K0632. The specific Kubota L-Series Tractor models included in this manual are: L48. The L48 Tractor is designed specifically for Small Farm Tractor; Suitable For Landscaping, Estate Maintenance, Equestrian Operations, Horse Farm, Commercial Use .
